## ArcelorMittal Zenica, d.o.o

### POLITIKA ZAŠTITE OKOLIŠA

Kompanija ArcelorMittal Zenica, d.o.o upravlja svim aspektima proizvodnje i prerade čelika kao i aspektima njenih podržavajućih procesa.

Čelik je materijal izbora za zaštitu okoliša. Ne samo da je neškodljiv, nego nadilazi druge materijale jer se lahko reciklira.

Ovakva izuzetna pogodnost za okoliš inkorporirana u sve proizvodne aktivnosti treba biti promovirana sljedećim principima:

1. Primjena sistema upravljanja okolišem (ISO 14001) u svim departmentima Društva;
2. Poštivanje svih relevantnih zakona i regulative iz oblasti zaštite okoliša, kao i drugih obaveza Društva;
3. Neprestano poboljšanje performansi iz oblasti zaštite okoliša, koristeći prednost sistemskog praćenja i poduzimanja aktivnosti na sprečavanju zagađenja;
4. Razvoj, poboljšanje i primjena za okoliš pogodnih proizvodnih metoda, koristeći prednost sirovina raspoloživih u lokalnom okruženju;
5. Razvoj i proizvodnja za okoliš pogodnih proizvoda, fokusirajući se na njihovu upotrebu i naknadno recikliranje;
6. Efikasna upotreba prirodnih izvora, energije i zemljišta;

### ENVIRONMENTAL POLICY

ArcelorMittal Zenica, d.o.o company manages all aspects of steel production and processing, as well as aspects of its supporting processes.

Steel is the material of choice for environmental protection. Not only is it environmentally friendly but also outperforms other materials because it is readily recycled.

Environmental excellence, incorporated into all processing activities, is to be promoted by the following principles:

1. Implementation of the environmental management system (ISO 14001) in the Company;
2. Compliance with all relevant environmental laws and regulations and other company commitments;
3. Continuous improvement in environmental performance, taking advantage of systematic monitoring and aiming at pollution prevention;
4. Development, improvement and application of low impact, environmental production methods taking benefit of locally available raw materials;
5. Development and manufacture of environmentally friendly products focusing on their use and subsequent recycling;
6. Efficient use of natural resources, energy and land;
